### PROFILE

Experienced Full Stack Developer with 2 years of hands-on expertise in web application development, particularly in designing, developing, and maintaining robust solutions. Proven track record of delivering high-quality results and collaborating effectively within cross-functional teams. Dedicated to staying updated with emerging technologies and adopting innovative approaches in software development.

### WORK EXPERIENCE

#### Full Stack Developer

GETster.TECH Pvt Ltd

May 2022 - present

- Worked on full-stack development, managing both front-end (Angular) and back-end (Nest.JS) components, ensuring seamless integration and functionality.
- Collaborated closely with UX/UI designers to implement responsive design principles, enhancing the accessibility and usability of applications on various screen sizes.
- Designed and developed responsive web applications using Angular, Nest.JS, and MySQL.
- Collaborated closely with experienced team members, gaining valuable insights into effective teamwork and project management.
- Implemented features such as leaflet maps, enabling dynamic and interactive geographical displays.
- Integrated calendar functionality to facilitate user-friendly schedule booking within the application.

#### Project Description

- Developed learning management system (LMS) projects for educational institutions, enabling users to manage course subjects, academic years, and institutional assessments.
- The projects were executed using Angular for the frontend and NestJS for the backend, resulting in a seamless and interactive learning experience.
- Designed and implemented the frontend using Angular, incorporating various Angular features such as forms, tabs, input methods, tables, cards, and paginators to enhance user interaction and experience.
- Implemented routing in Angular to navigate between different sections of the application, ensuring a smooth flow of user interaction.
- Integrated external applications through iframes to enhance functionality and provide additional resources to users.
- Integrated multiple Angular packages to streamline data input and harnessed Leaflet maps for visualizing geographical data.
- Implemented time-related functionalities using Luxon library, enhancing the accuracy and presentation of time-related information.
- Successfully delivered a user-friendly platform, optimizing the creation and review of flashcards for educational purposes.
